**LiftSafe Forklift Training**

*Presents:*

# **Forklift Instructor Certification**

*As of December 1st, 1999 OSHA (July 15th, 2000 Cal/OSHA) has required that your lift truck operators be trained and evaluated in an equipment and site specific manner. Bring your company into compliance with this “train the trainer” seminar. You will be taught the LiftSafe™ method of forklift operator training and will be provided the tools, knowledge and hands-on experience necessary to implement a forklift operator training program at your facility.*

## *Seminar Overview:*

- *Statistical data on forklift accidents*
- *Federal OSHA 29 CFR Ch. XVII 1910.178 regulations, including 12/1/98 rule*
- *CAL/OSHA 3657-3664 requirements*
- *Complete coverage of operator training class, including Loading Dock and Warehouse Safety, Forklift Types and Components, Pre-shift Inspections, Design Principles, Operating Fundamentals, Recharging/Refueling Procedures and more*
- *Classroom instructor techniques*
- *Actual forklift operation and hands-on evaluation learning exercises*
- *Final test , certificates awarded*

*Course materials cover all popular forklift types, including sit-down counterbalanced, reach trucks, order pickers and powered walk behinds*

## *Materials Include:*

- *Forklift Instructor Training and Resource Guide*
- *5 copies of The Professional Operator Written Response Workbook*
- *Instructor’s Presentation & Training Techniques book*
- *Reproducible Pre-shift Inspection and Operator Evaluation forms*
- *Certificate of Completion*
