

CROMER EQUIPMENT COMPANY
East Bay Clarklift / Cromer Clarklift / Buehrer

presents:

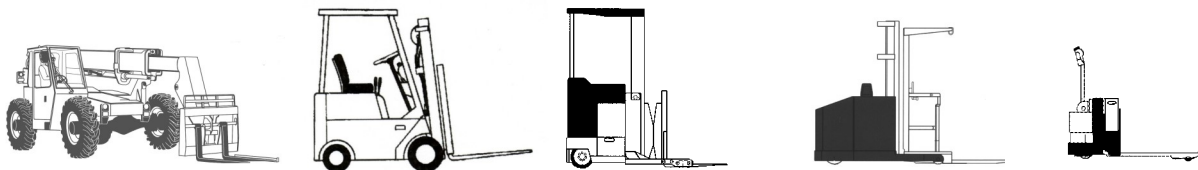

Forklift Instructor Certification

Since December 1st, 1999 OSHA (July 15th, 2000 Cal/OSHA) has required that lift truck operators be trained and evaluated in an equipment and site specific manner. Bring your company into compliance with this “train the trainer” seminar. You will be taught the LiftSafe® method of forklift operator training and will be provided the tools, knowledge and hands-on experience necessary to implement a forklift operator training program at your facility.

Seminar Overview:

- Statistical data on forklift accidents
- Federal OSHA 29 CFR Ch. XVII 1910.178 powered industrial truck regulations
- CAL/OSHA GISO 3657-3668 powered industrial truck requirements
- Complete coverage of operator training class, including Loading Dock and Warehouse Safety, Forklift Types and Components, Pre-shift Inspections, Design Principles, Operating Fundamentals, Recharging/Refueling Procedures and more
- Forklift Accident Summaries
- Classroom instructor techniques
- Actual forklift operation and hands-on evaluation learning exercises
- Final test, certificates awarded

Training covers all ITA classes 1-7, electric and internal combustion, including rough terrain, warehouse style counterbalanced, narrow aisle and powered walk behinds

Materials Include:

- Forklift Instructor Training and Resource Guide
- 5 copies of The Professional Operator Written Response Workbook
- Reproducible Pre-shift Inspection and Operator Evaluation forms
- Certificate of Completion
- 3 years consultation support by phone or email
